

Childrens Travel Behavior and Its Effect on Transport Policy (Chinese Edition)

This book regards the children ranging from 6 to 12 years old as the object, researches their influence on the travel behavior of family members and analyzes the influence on their travel influence around the related social and economic attributes of the family members, so as to better understand the influence or possible influence of social development on Childrens travel behaviors. The book also analyzes kinds problems arising from the associated travel of children, especially the influence on the traffic in peak time, explores the applicability of the existing transportation demand management policies on children and their companions, and taps the urban traffic demand management measures based on childrens travel demand management. Based on this, it puts forward policy research support and advices.
