# Professional ADO 2.5 Programming (Wrox Professional Guide)

All windows developers need to use ADO. ActiveX Data Objects (ADO) 2.5 is Microsofts latest Data Access technology. It is used to enable fast and efficient data transfer between a database and the end users. Whats more, ADO 2.5 works across a range of languages (VB, VC, ASP, Access, Office etc) and with a range of back-end databases - SQL Server 7, Oracle 8i, Access 2000 etc. Almost all developers work with some combination of these technologies, so they all need to know ADO.
