

# RINGS: A Software Development and Management Methodology: An Evolutionary Methodology for Software Developers from Chaos to Excellence

This book is an essay of a new software development methodology. This methodology is prepared according to the agile manifesto and also accepts the accreditation obligation in market. Because of this obligation, the overall system is controlled also for Capability Maturity Model via its checklist. Another property of this management system for a software development process is that the system also advises a natural improvement path for the company from a chaotic work-flow to a disciplined and controlled system. This thesis includes the entire acceptance and the usage manual of the new methodology. So, the developers, who will try to apply this methodology in their companies, will find a complete guide for a successful implementation with process model, role definitions and documentation requirements.
