

A Self-Criticism

A Self-Criticism focuses on Monte Melkonian's secretive participation in armed struggle in Europe and the Middle East between 1975-1990. Sometimes falling into ideological jargon, his comments are forthright and give invaluable insights into one of the most secretive and deadly terrorist organisations of the 1970s. Melkonian's own integrity comes to the fore in these accounts and A Self-Criticism allows us to unravel some of the myths and realities surrounding what also became known as the Armenian armed struggle of the 1970s. The number of operatives was smaller than one might have expected, and the rank-and-file much more ideologically driven and dedicated to broader struggles against western world imperialism. Melkonian exposes ASALA as a highly rigid organisation, even a dysfunctional one. One does not have to endorse or oppose Melkonian's words but there is value in listening to his views. His self-criticism is the sort of key text that history is made up of and, as such, it is bound to lead to much debate and controversy.
